## Angleščina

Specifications in this manual as subject to change without notice in order that Hisense may bring the latest innovations to their customers:

English version is the original and other languages so far as they are in English. In case of any discrepancy between the English and the translated versions, the English version shall prevail.

## Prancøis

Les caractéristiques publiées dans ce manuel peuvent être modifiées sans préavis, Hisense souhaitant pouvoir toujours offrir à ses clients les dernières innovations.

La version anglaise est la version originale; les autres langues sont traduites de l'anglais. En cas de divergence entre les versions anglaise et traduite, la version anglaise prévaut.

---

Las especificaciones de este manual están sujetas a cambios sin previo aviso a fin de que Hisense pueda ofrecer los últimos innovaciones a sus clientes.

La versión en inglés es la original, y las versiones en otros idiomas son traducciones de la inglesa. En caso de discrepancia entre la versión inglesa y las versiones traducidas, prevalecerá la versión inglesa.

## Itallano

Lo specifiche di questo manuale sono soggette a modifiche senza preavviso affinché Hisense possa offrire ai propri clienti le ultime novità.

La versione inglese è l'originale e le versioni in altre lingue sono traduzioni dall'inglese. In caso di divergenza tra la versione in altre lingue e quella originale, fa fede la versione inglese.

## Deutsch

Benennung der technischen Angaben in diesem Handbuch sind Änderungen vorbehalten, damit Hisense seinen Kunden die jeweils neuesten Innovationen präsentieren kann.

D.h. die englische Fassung ist die Originalfassung, und die Fassungen in anderen Sprachen herangezogen werden dürfen. Im Falle von Abweichungen zwischen der englischen und den übersetzten Fassungen voneinander abzuweichen, so hat die englische Fassung Vorrang.

## Português

As especificações apresentadas neste manual estão sujeitas a alterações sem aviso prévio, de modo a que a Hisense possa oferecer aos seus clientes, da forma mais adequada possível, as novidades mais recentes.

A versão em inglês é a original; as versões em outras línguas são traduções do inglês. Em caso de divergência entre a versão em inglês e as versões em outras línguas, faz fé a versão em inglês.

## Nederlän

De specificaties in deze handleiding kunnen worden gewijzigd zonder verdere kennisgeving zodat Hisense zijn Klanten kan voorzien van de nieuwste innovaties.

De Engelse versie is de originele; andere talen zijn afgeleid uit het Engels. In geval van afwijkingen tussen de Engelse versie en de vertaalde versies, heeft de Engelse versie de voorrang.

---

Zamieszczone w niniejszym podręczniku usługi i techniczne dane mogą ulec zmianie bez uprzedzenia po wiadomościach z góry na innoacyjne potrzeby. jakieś zmiany Hisense może wprowadzić z pomocą swoich klientów.

Wersja oryginalna - wszystkie pozostałe - nie są oryginalne - wszystkie pozostałe - nie są oryginalne. W przypadku różnic między wersjami, rozstrzyga się na jego korzyść. rozstrzyga się na jego korzyść.

---

Bu k lavuzdaki teknik özellikler Hisense'nin müşterilerine en yeni inovasyonlar için önceden haber vermeden değiştirilebilir.

İngilizce orijinal olan diğer tüm diller ise İngilizce'den çevrilmiştir. İngilizce ve çevrilmiş sürümler arasında farklılık olmaması durumunda İngilizce. Sürüm o aşılabilir.

## Română

Specificațiile din acest manual pot fi modificate fără notificare prealabilă, Hisense să poată pune la dispoziția clienților ultimele inovații.

Verziunea originală este cea în limba engleză; versiunile în alte limbi sunt traduse din limba engleză. Dacă există o discrepanță între versiunile în limba engleză și cele traduse, se aplică versiunea în limba engleză.

## Ελληνικά

Οι προδιαγραφές του εγχειριδίου μπορούν να αλλάξουν χωρίς προειδοποίηση, προκειμένου η HISENSE να παρέχει τις τελευταίες καινοτομίες στους πελάτες της.

Οι πρωτότυπες οδηγίες είναι στα αγγλικά. Οι άλλες γλώσσες είναι μετάφραση από τα αγγλικά. Αν υπάρχει οποιαδήποτε ασυμφωνία ανάμεσα στην αγγλική και τις μεταφράσεις, αυτή που επικρατεί είναι η αγγλική έκδοση.

## CAUTION

This product shall not be mixed with general house waste at the end of its life and it shall be retired according to the appropriated local or national regulations in an environmentally correct way.

Due to the refrigerant, oil and other components contained in heat pump, its dismantling must be done by a professional installer according to the applicable regulations. Contact to the corresponding authorities for more information.

## ADVERTISSEMENT

Ne doit pas être mélangé aux ordures ménagères ordinaires à la fin de sa vie utile et qu'il doit être éliminé conformément à la réglementation locale ou nationale, dans le plus strict respect de l'environnement.

En raison du frigorigène, de l'huile et des autres composants que contient la pompe à chaleur, son démontage doit être effectué par un installateur professionnel conformément aux réglementations en vigueur.

## PRECAUCIÓN

Este producto no se debe eliminar con la basura doméstica al final de su vida útil y se debe desechar de manera respetuosa con el medio ambiente de acuerdo con los reglamentos locales o nacionales aplicables.

Debido al refrigerante, el aceite y otros componentes contenidos en la bomba de calor, su desmontaje debe realizarlo un instalador profesional de acuerdo con la normativa aplicable. Para obtener más información, póngase en contacto con las autoridades competentes.

## AVVERTENZE

Indicazioni per il corretto smaltimento del prodotto ai sensi della Direttiva Europea 2011/65/EU e D.Lgs 4 marzo 2014 n.27

Il simbolo del cassonetto barrato riportato sull'apparecchiatura indica che il prodotto alla fine della propria vita utile deve essere raccolto separatamente dagli altri rifiuti.

L'utente dovrà, pertanto, conferire l'apparecchiatura giunta a fine vita agli idonei centri di raccolta di frazionata dei rifiuti elettronici ed elettrotecnici, oppure riconsegnarla al rivenditore al momento dell'acquisto di una nuova apparecchiatura di tipo equivalente.

L'adeguata raccolta differenziata delle apparecchiature dismesse, per il loro avvio al riciclaggio, al trattamento ed allo smaltimento ambientalmente compatibile, contribuisce ad evitare possibili effetti negativi sull'ambiente e sulla salute e favorisce il riciclo dei materiali di cui è composta l'apparecchiatura.

Non tentate di smontare il sistema o l'unità da soli poiché ciò potrebbe causare effetti dannosi sulla vostra salute o sull'ambiente.

Vogliate contattare l'installatore, il rivenditore, o le autorità locali per ulteriori informazioni.

Lo smaltimento abusivo del prodotto da parte dell'utente può comportare l'applicazione delle sanzioni amministrative di cui all'articolo 50 e seguenti del D.Lgs. n. 22/1997.

## VORSICHT

Dass Ihr Produkt am Ende seiner Betriebsdauer nicht in den allgemeinen Hausmüll geworfen werden darf, sondern entsprechend den geltenden örtlichen und nationalen Bestimmungen auf umweltfreundliche Weise entsorgt werden muss.

Aufgrund des Kältemittels, Öls und anderer Komponenten in der Wärmepumpe muss ihr Ausbau von einem professionellen Installateur entsprechend der anwendbaren Vorschriften durchgeführt werden. Für weitere Informationen setzen Sie sich bitte mit den entsprechenden Behörden in Verbindung.

## CUIDADO

O seu produto não deve ser misturado com os desperdícios domésticos de carácter geral no final da sua duração e que deve ser eliminado de acordo com os regulamentos locais ou nacionais adequados de uma forma correcta para o meio ambiente.

Por causa do refrigerante, do óleo e de outros componentes na bomba de calor, o desmantelamento deve ser realizado por um instalador profissional em conformidade com os regulamentos aplicáveis. Contacte as autoridades correspondentes para obter mais informações.

## VOORZICHTIG

Dit houdt in dat uw product niet wordt gemengd met gewoon huisvuil wanneer u het weg doet en dat het wordt gescheiden op een milieuvriendelijke manier volgens de geldige plaatselijke en landelijke reguleringen.

Wegens de aanwezigheid van koelmiddel, olie en andere componenten in de warmtepomp moet het apparaat volgens de toepasselijke regelgeving door een professionele installateur worden gedemonteerd. Neem contact op met de betreffende overheidsdienst voor meer informatie.

## OSTROŻNIE

Po zakończeniu okresu użytkowania produktu, nie należy go wyrzucać z odpadami komunalnymi, lecz dokonać jego usunięcia w sposób ekologiczny zgodnie z obowiązującymi w tym zakresie przepisami prawa lokalnego lub krajowego.

Ponieważ pompa ciepła zawiera czynniki chłodnicze i oleje oraz innego rodzaju elementy składowe, jej demontaż należy powierzyć wskazanemu w obowiązujących przepisach specjalistycznemu podmiotowi. Szczegółowe informacje na ten temat można uzyskać, kontaktując się z właściwymi organami władzy samorządowej.

## DİKKAT

Bu ürün kullanım ömrü dolduğunda genel ev atıklarıyla karıştırılmamalı ve belirlenmiş yerel veya ulusal yönetmeliklere göre çevre dostu biçimde bertaraf edilmelidir.

Isı pompasında yer alan soğutucu madde, yağ ve diğer bileşenlerden dolayı sökme işlemi, uygulanır yönetmeliklere göre profesyonel bir tesisatçı tarafından yapılmalıdır. Daha fazla bilgi için ilgili merciye başvurun.

## PRECAUȚIE

Acest produs nu trebuie aruncat la gunoii menajer la sfârșitul duratei sale de viață, ci trebuie scos din uz în conformitate cu reglementările locale sau naționale adecvate și într-un mod corect din punct de vedere al protecției mediului.

Datorită agentului frigorific, a uleiului și a altor componente pompei de căldură, demontarea acestuia trebuie făcută de un instalator profesionist în conformitate cu reglementările aplicabile. Contactați autoritățile competente pentru mai multe informații.

## ΠΡΟΣΟΧΗ

Σημαίνει ότι το προϊόν δεν θα πρέπει να αναμιχθεί με τα διάφορα οικιακά απορρίμματα στο τέλος του κύκλου ζωής του και θα πρέπει να αποσυρθεί σύμφωνα με τους κατάλληλους τοπικούς ή εθνικούς κανονισμούς και με τρόπο φιλικό προς το περιβάλλον.

Λόγω του ψυκτικού, του λαδιού και άλλων εξαρτημάτων που περιλαμβάνονται στην αντλία θέρμανσης, η αποσυναρμολόγησή του πρέπει να γίνει από εξουσιοδοτημένο επαγγελματία τεχνικό, σύμφωνα με τους ισχύοντες κανονισμούς. Για περισσότερες λεπτομέρειες, επικοινωνήστε με τις αντίστοιχες αρχές.

## TECHNICAL PARAMETERS

Following Regulation EU No. 517/2014 on Certain Fluorinated Greenhouse gases, it is mandatory to fill in the label attached to the unit with the total amount of refrigerant charged on the installation.  
Do not vent R32 into the atmosphere: R32 are fluorinated greenhouse gases covered by the Kyoto protocol global warming potential (GWP) R32 = 675

Tonajul echivalent CO<sub>2</sub> al gazelor fluorurate cu efect de seră conținute se calculează prin indicarea GWP \* Cantitate totală (în kg) indicată în eticheta produsului și împărțită la 1000.

Σύμφωνα με τον Κανονισμό 517/2014/EK για για ορισμένα φθοροϋχα αέρια θερμοκηπίου, είναι υποχρεωτική η συμπλήρωση της επισήμανσης που επισυνάπτεται στη μονάδα με το συνολικό ποσό ψυκτικού που εισήχθη κατά την εγκατάσταση.  
Μην απελευθερώνετε R32 στην ατμόσφαιρα. Τα R32 είναι φθοροϋχα αέρια του θερμοκηπίου που εμπίπτουν στο πρωτοκόλλο του Κιότο δυναμικού του πλανήτη (GWP) R32 = 675.  
Τη ισοδύναμο CO<sub>2</sub> φθοροϋχών αερίων θερμοκηπίου που περιέχονται υπολογίζεται από υποδεικνύεται GWP \* Συνολική πλήρωση (σε kg) που αναφέρεται στην ετικέτα του προϊόντος και χωρίζονται από το 1000.

English (Only when using R32)

**⚠ WARNING**

**BURST HAZARD**

Do not allow air or any gas mixture containing oxygen into refrigerant cycle (i.e. piping)

**RISK OF EXPLOSION**

The compressor must be stopped before removing the refrigerant pipes.

All service valves must be fully closed after pumping down operation.

**WARNING**

This symbol displayed on the unit indicates that this appliance is filled with R32, an odourless flammable refrigerant gas with low burning velocity (A2L class pursuant to ISO 817). If the refrigerant is leaked, there is a possibility of ignition if it enters in contact with an external ignition source.

**CAUTION**

This symbol displayed on the unit indicates that this appliance shall be handled by authorized service personnel only, referring to the Installation Manual.

**CAUTION**

This symbol displayed on the unit indicates that there is relevant information included in the Operation Manual and/or Installation Manual.

Français (Seulement en utilisant R32)

**⚠ AVERTISSEMENT**

**DANGER D'ÉCLATEMENT**

Évitez que de l'air ou un mélange de gaz contenant de l'oxygène ne pénètre dans le cycle frigorifique (c.-à-d. tuyauterie).

**RISQUE D'EXPLOSION**

Veillez à arrêter le compresseur avant de retirer les tuyauteries frigorifiques.

Veillez à fermer complètement toutes les vannes de service après la vidange.

**AVERTISSEMENT**

Ce symbole affiché sur l'appareil indique que l'appareil est chargé avec R32, un gaz frigorigène inflammable sans odeur à basse vitesse de combustion (Classe A2L selon ISO 817). En cas de fuite de frigorigène, il existe un risque d'incendie si celui-ci est exposé à une source d'inflammation externe.

**ATTENTION**

Ce symbole affiché sur l'appareil indique que seul le personnel de maintenance autorisé doit manipuler l'équipement, en se reportant au manuel d'installation.

**ATTENTION**

Ce symbole affiché sur l'appareil indique que le manuel de fonctionnement et/ou le manuel d'installation contient des informations importantes.

Español (Sólo cuando se utiliza R32)

**⚠ ADVERTENCIA**

**RIESGO DE EXPLOSIÓN**

Evite la entrada de aire o cualquier mezcla de gases que contenga oxígeno en el ciclo de refrigerante, por ejemplo, en las tuberías.

**RIESGO DE EXPLOSIÓN**

Antes de retirar las tuberías de refrigerante debe detener el compresor.

Tras recuperar el refrigerante todas las válvulas de servicio deben estar completamente cerradas.

**ADVERTENCIA**

Este símbolo mostrado en el aparato indica que este está cargado con R32, un gas refrigerante inflamable e inodoro con una velocidad de combustión lenta (Clase A2L de acuerdo con ISO 817). Una fuga de refrigerante puede provocar un incendio si entra en contacto con una fuente de combustión externa.

**PRECAUCIÓN**

Este símbolo mostrado en el aparato indica que este debe ser manipulado únicamente por personal de un servicio autorizado con el soporte del manual de instalación.

**PRECAUCIÓN**

Este símbolo mostrado en el aparato indica que los manuales de funcionamiento y/o de instalación contienen información importante.

Italiano (Solo quando si usa R32)

**⚠ AvvERTENzA**

**PERICOLO DI SCOPPIO**

Fare in modo che all'interno del ciclo di refrigerazione non entrino aria o qualsiasi miscela di gas contenente ossigeno (per es. le tubazioni).

**RISCHIO DI ESPLOSIONE**

Il compressore deve essere arrestato prima di rimuovere i tubi del refrigerante.

Tutte le valvole di servizio devono essere completamente chiuse dopo lo svuotamento della pompa.

**AVVERTENZA**

Questo simbolo visualizzato sull'unità indica che l'unità è carica con R32, un gas refrigerante infiammabile e inodore con una velocità di combustione lenta (Classe A2L secondo ISO 817). Una perdita di refrigerante può provocare un incendio se entra a contatto con una fonte di combustione esterna.

**AvvERTENzA**

Questo simbolo visualizzato sull'unità indica che l'unità deve essere gestita solo da personale di servizio autorizzato, facendo riferimento al Manuale di Installazione.

**AvvERTENzA**

Questo simbolo visualizzato sull'unità indica che ci sono informazioni rilevanti incluse nel Manuale d'uso e/o nel Manuale di Installazione.

Deutsch (Nur bei Verwendung von R32)

**⚠ wARNUNG**

**BERSTgEFahr**

Lassen Sie nicht zu, dass Luft oder eine Sauerstoff enthaltene Gas-mischung in den Kältemittelauslauf (z. B. Rohrleitungen) gelangt.

**EXPLOSIONSGEFahr**

Der Kompressor muss abgeschaltet werden, bevor die Kältemittel-leitungen entfernt werden.

Alle Betriebsventile müssen nach dem Abpumpbetrieb vollständig geschlossen sein.

**WARNUNG**

Dieses auf dem Gerät angezeigte Symbol zeigt an, dass das Gerät ist mit dem R32 geruchlosen brennbaren Kältemittel mit niedriger Brenngeschwindigkeit gefüllt (Klasse A2L gemäß ISO 817). Bei einem Kältemittelaustritt besteht die Gefahr der Entzündung, wenn das Kältemittel in Kontakt mit einer äußeren Zündquelle kommt.

**vORSICHT**

Dieses auf dem Gerät angezeigte Symbol zeigt an, dass dieses Gerät ein entzündbares Kältemittel verwendet. Bei einem Kältemittelaustritt besteht die Gefahr der Entzündung, wenn das Kältemittel in Kontakt mit einer äußeren Zündquelle kommt.

**vORSICHT**

Dieses auf dem Gerät angezeigte Symbol zeigt an, dass wichtige Informationen im Betriebshandbuch und/oder Installationshandbuch enthalten sind.

Português (Somente quando usar R32)

**⚠ ATENÇÃO**

**PERIGO DE REBENTAMENTO**

Não permitir a entrada de ar ou de qualquer mistura de gás com oxigênio para o ciclo de refrigeração (isto é, para lubagem).

**RISCO DE EXPLOSIÃO**

O compressor deve ser desligado antes da remoção dos tubos de refrigerante.

As válvulas de manutenção devem estar completamente fechadas depois da eliminação do refrigerante.

**ATENÇÃO**

Este símbolo mostrado na unidade indica que a unidade contém R32, um gás refrigerante inflamável e inodoro com uma baixa velocidade de queima (Classe A2L de acordo com ISO 817). Em caso de fuga de refrigerante, existe a possibilidade de ignição se entrar em contacto com uma fonte de ignição externa.

**CAUIDADO**

Este símbolo mostrado na unidade indica que a unidade deve ser manuseada apenas por pessoal autorizado, mediante consulta do Manual de Instalação.

**CAUIDADO**

Este símbolo mostrado na unidade indica que o Manual de Funcionamento e/ou Instalação inclui informação relevante.

**WAARSCHUWING****BARSTgEvAAR**

Laat geen lucht of een gasmengsel dat zuurstof bevat in de koel-middelcyclus (d.w.z. leidingen).

**EXPLOSIEGEVAAR**

De compressor moet worden gestopt alvorens de koelmiddelpijpen te verwijderen.

Alle onderhoudskranen moeten volledig gesloten zijn na het pompen.

**WAARSCHUWING**

Dit symbool op het apparaat geeft aan dat het apparaat is gevuld met R32, een geurloos ontvlambaar koelmiddel met een lage brandbaarheid (klasse A2L volgens ISO 817). Als het koelmiddel lekt, kan het ontbranden wanneer het in contact komt met een ex-terne ontstekingsbron.

**LET OP**

Dit symbool op het apparaat geeft aan dat het apparaat alleen door bevoegd personeel mag worden gebruikt, met verwijzing naar de installatiehandleiding.

**LET OP**

Dit symbool op het apparaat geeft aan dat er relevante informatie is opgenomen in de gebruiksaanwijzing en / of installatiehandleiding.

**OSTRZEŻENIE  
ZAGROŻENIE WYBUCHEM**

Niedopuszczalne jest przedostanie się powietrza lub mieszanki gazowej zawierającej tlen do obrotu (tj. przewodów rurowych) czynnika chłodniczego.

**RYZYKO WYBUCHU**

Przed odłączeniem przewodów rurowych czynnika chłodniczego należy wyłączyć sprężarkę.

Po odzyskaniu chłodziwa, niezbędne

jest całkowite zamknięcie wszystkich zaworów serwisowych.

**OSTRZEŻENIE**

Umieszczenie tego symbolu na jednostce oznacza, że jest ona napełniona czynnikiem chłodniczym R32, bezwonny i palnym gazem o niskiej prędkości spalania (klasa A2L zgodnie z normą ISO 817). Wyciek chłodziwa może spowodować pożar, gdyby doszło do kontaktu z zewnętrznym źródłem zapalenia.

**OSTROŻNIE**

Umieszczenie tego symbolu na jednostce oznacza, że może być ona obsługiwana wyłącznie przez pracowników autoryzowanego serwisu w oparciu o informacje zawarte w instrukcji instalacji.

**OSTROŻNIE**

Umieszczenie tego symbolu na jednostce oznacza, że w instrukcji obsługi i/lub instrukcji instalacji znajdują się ważne informacje na dany temat.

**UYARI  
PATLAMA TEHLİKESİ**

Soğutucu madde döngüsünün (ör. boruların) içine havanın ya da oksijen içeren herhangi bir gaz karışımının girmesine izin vermenin **PATLAMA RİSKİ**

Soğutucu madde boruların sökülmeden önce kompresör mutlaka durdurulmalıdır.

Patlamaya başlatma işleminden sonra tüm servis valfleri mutlaka tamamen kapatılmalıdır.

**UYARI**

Ünitede görüntülenen bu sembol, bu cihazın düşük yanma hızına sahip kokusuz ve tutuşucu soğutucu gazı olan R32 ile dolu olduğunu gösterir (ISO 817'ye göre A2L sınıfı). Soğutucu gazı sızarsa harici bir ateşleme kaynağına temas etmesi durumunda tutuşma olasılığı vardır.

**DİKKAT**

Ünitede görüntülenen bu sembol, bu cihazla ilgili işlemleri yalnızca yetkili servis personeli tarafından Kurulum Kılavuzuna başvurularak yapılacağını gösterir.

**DİKKAT**

Ünitede görüntülenen bu sembol, Kullanım Kılavuzunda ve/veya Kurulum Kılavuzunda ilgili bilgilerin mevcut olduğunu gösterir.

**AVERTISMENT****PERICOL DE DEFLAGRAȚIE**

Nu permiteți pătrunderea aerului sau oricărui amestec de gaz care conține oxigen în ciclul agentului frigorific (adică în conducte).

**RISC DE EXPLOZIE**

Trebuie să opriți compresorul înainte de a decupla conductele de agent frigorific.

Toate suprafețele de serviciu trebuie să fie complet închise după finalizarea operației de evacuare a agentului frigorific.

**AVERTISMENT**

Această pictogramă afișată pe unitate indică faptul că acest aparat este umplut cu R32, un gaz frigorific inflamabil înodor, cu viteză de ardere redusă (clasa A2L conform standardului ISO 817). Pierderile de agent frigorific pot cauza pericol de aprindere dacă intră în contact cu o sursă de aprindere externă.

**PRECAUȚIE**

Această pictogramă afișată pe unitate indică faptul că acest aparat trebuie să fie manipulat doar de personal de service autorizat, respectându-se instrucțiunile din manualul de instalare.

**PRECAUȚIE**

Această pictogramă afișată pe unitate indică faptul că manualul de operare și/sau manualul de instalare conțin informații importante.

**ΠΡΟΕΙΔΟΠΟΙΗΣΗ****ΚΙΝΔΥΝΟΣ ΘΩΤΙΑΣ**

Μην επιτρέψετε την είσοδο αέρα ή οποιαδήποτε μείγμα αερίων που περιέχει οξυγόνο στον κύκλο ψυκτικού μέσου (δηλαδή σωλήνωση).

**ΚΙΝΔΥΝΟΣ ΕΚΦΡΗΣΗΣ**

Ο συμπιεστής πρέπει να έχει σταματήσει προτού αφαιρέσετε τους σωλήνες ψυκτικού μέσου.

Όλες οι βελβίδες λειτουργίας πρέπει να είναι πλήρως κλειστές μετά την λειτουργία άνιλησης.

**ΠΡΟΕΙΔΟΠΟΙΗΣΗ**

Αυτό το σύμβολο που εμφανίζεται στη μονάδα δείχνει ότι η μονάδα είναι γεμάτη με R32, ένα άοσμο, εύφλεκτο ψυκτικό με χαμηλή ταχύτητα καύσης (κλάση A2L σύμφωνα με το πρότυπο ISO 817). Η διαρροή του ψυκτικού μέσου μπορεί να προκαλέσει πυρκαγιά αν έρθει σε επαφή με ένα εξωτερικό μέσο.

**ΠΡΟΣΟΧΗ**

Αυτό το σύμβολο που εμφανίζεται στη μονάδα δείχνει ότι η μονάδα πρέπει να πραγματοποιείται μόνο από εξουσιοδοτημένο προσωπικό σύμφωνα με το εγχειρίδιο εγκατάστασης.

**ΠΡΟΣΟΧΗ**

Αυτό το σύμβολο που εμφανίζεται στη μονάδα δείχνει ότι υπάρχουν σχετικές πληροφορίες στο εγχειρίδιο λειτουργίας και/ή στο εγχειρίδιο εγκατάστασης.

## Hisense

- Means for disconnection from the supply mains, which have a contact separation in all poles that provide full disconnection under overvoltage category III conditions must be incorporated in the fixed wiring in accordance with the wiring rules.
- The appliance shall be installed in accordance with national wiring regulations.
- The installation and service of this product shall be carried out by professional personnel, who have been trained and certified by national training organizations that are accredited to teach the relevant national competency standards that may be set in legislation.
- Mechanical connectors used indoors shall comply with ISO 14303. When mechanical connectors are reused indoors, sealing parts shall be renewed. When flared joints are reused indoors, the flare part shall be re-fabricated. **Flared joints and flared joints are not allowed indoors.**
- **Do not connect the power source during service and when replacing parts.**

### CAUTION

- Do not use any sprays such as insecticide, lacquer, hair spray or other flammable gases within approximately 1 meter from the system.
- If circuit breaker or fuse is often activated, stop the system and contact your service contractor.
- Do not make service or inspections tasks by yourself. This work must be performed by qualified service person.
- Do not put any foreign material (sticks, etc...) inside the units. These units have high speed rotating fans and it is dangerous to touch them.
- Installation and service engineering must comply with local regulations.
- This air to water heat pump has been designed for standard water heating for human beings only. Do not use this for other functions that are not included in the wired controller.

- At lv ul 3 meuars Atom ulron9 eiactmmagnetic we ve radiolot4. sub a4 'rsdié equfpmrrit.

- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

### NOTE

- It is recommended to ventilate the room every 3 or 4 hours.
- The air conditioner may not work properly in the following cases:
  - The power supplied by the power transformer is less than or equal to the electric power of the air conditioner.
  - The large power-consuming equipment is too close to the power supply wiring of the air conditioner, large surge voltage may be inducted in the power supply wiring of the air conditioner.

6. SPLOŠNE DIMENSIONS

7. NAMESTITEV ENOTE

cautio

- Install the unit in the shade or not exposed to direct sunshine or direct radiation from high temperature heat source.

Make sure that the foundation is flat and sufficiently strong. This unit has aluminum fin with sharp edges. Pay attention to the fin to avoid injury. Install the unit in a restricted area not accessible by the general public. When installing the outdoor unit in snow-covered areas, mount the field-supplied hoods at the discharge side of the outdoor unit and the inlet side of the heat exchanger. Do not install the unit in a space where a seasonal wind directly blows to the outdoor heat exchanger or a wind from a building space directly blows to the outdoor fan.

- a In case of installation in the open spaces where there are no buildings or surrounding structures, install next to the wall to avoid facing the wind directly. Poskrbite za to, da bo prostor za aerovico bjeen od neposredne sonne svetlobe ali direktnega toplotevanja. Poskrbite za to, da bo prostor za aerovico bjeen od neposredne sonne svetlobe ali direktnega toplotevanja.

### 7: 3 DRAIN PIPING

only utilized as

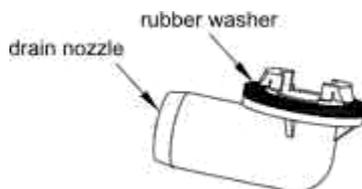

When the outdoor unit is installed, a drain pipe and drain nozzle are required. A drain nozzle is needed.

It is necessary to install a drain pipe and drain nozzle.

Use the outdoor unit provided with the drain pipe and drain nozzle. Do not use other types of drain pipes or drain nozzles. The drain pipe should be installed before the refrigerant piping work.

#### NOTE

- A drain pipe (inner diameter: 15mm) should be field-supplied.
- Do not use this drain nozzle in a cold area, because the drain water may freeze.
- The rubber plug is factory-supplied.
- Please install the drain nozzle and rubber plug before the refrigerant piping work.

### 8. NAPELJAVE HLADILNEGA SREDSTVA K A U T O N

Make sure that refrigerant piping installation complies with EN 378 in the local legislation.

#### 8.1 CEVOVODI MATERIALI

1. Prepare field-supplied copper pipe:

2. Select the piping with the correct material which has the correct material.

3. Choose clean pipes for the system: In this case, it is necessary to ensure that the pipes are clean and dry internally.

#### NOTE

- A system with no moisture or oil contamination will give the best performance.

#### CAUTION

- All external piping shall be selected in size and dimension avoiding any mechanical strength due to contraction or expansion, vibration or refrigerant pulsation.
- All the piping shall be protected against any environmental effect like water freezing, corrosion, etc. When flexible pipe is used, precautions shall be taken against mechanical damages.
- Ensure that refrigerant piping is earthed prior to units installation.
- Do not put pipes on the ground directly without a cap or vinyl tape at the end of the pipe. The pipe is to be inserted through a cap or vinyl tape.

- If piping installation is not completed until next day or over a longer period of time, braze off the ends of the piping and charge with oxygen free nitrogen through a Schrader valve type access fitting to prevent moisture and particle contamination.

#### CAUTION

- Do not use insulation material that contains NH<sub>3</sub> because it can damage copper pipe material and can be a source of future leakage.

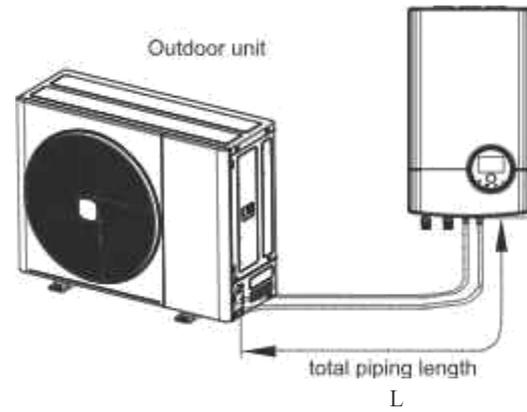

Insulate the piping between the indoor unit and the outdoor unit. If not insulated, dew will occur on the piping surface.

8.2 PIPING SIZE

- Enota Out6'or

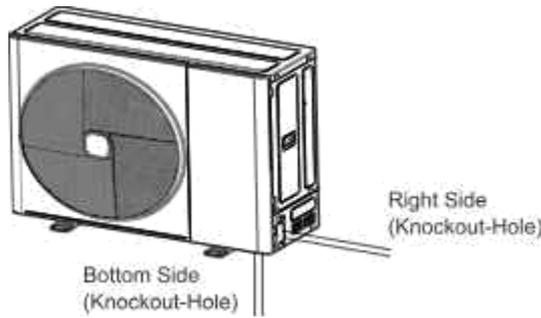

Capacity	Stop valve(mm)	
100-160 (3.5-6.0HP)	1088	1088

## 8.4 TEST ZRAČNEGA VIDIKA

1. Connect the manifold gauge using charging hoses with a vacuum pump to the joint of the gas stop valve. Apply nitrogen gas pressure of 0.1MPa.
2. Preverite morebitno uhajanje plina na maticah za odpenjanje. Or brazed parts by gas leak detects or toaming agent.
3. Po opravljenem preskusu zračne trdnosti popraviš en gas.

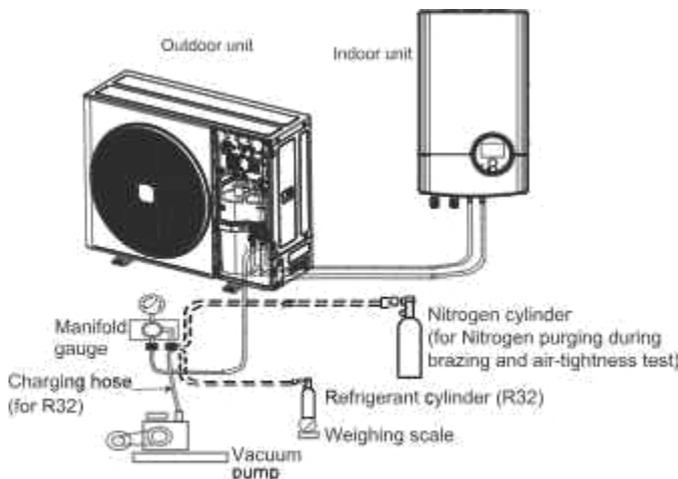

## NOTE

- Do not open the stop valves during the air-tightness test.

8.5 Črpanje in hlajenje zraka  
CHARGE

1. Connect the manifold gauge using charging hoses with a vacuum pump to the joint of the gas stop valve.
2. Nadaljujte z delom črpalke, dokler tlak ne doseže -0,1 MPa ali nižje za dve do tri ure.

3. Po vacuum črpanje dela. stag manifold merilnik s valje. na vrhu vakuumske črpalke in pustite stati eno uro. Poskrbite, da se prednapetost v razdelilniku, merilnik ne bo vnel.
4. Fully open the gas stop valve and liquid stop valve.
5. Sód hladilno sredstvo a rdińg do .premera cevovoda in .plpńg dolžina na področju:connedńng,
6. Preverite, ali je prišlo do uhajanja plina s sredstvom za odpravljanje uhajanja plina ali s sredstvom za čiščenje pene. U.se penilec 'a,ihic doeB ne ustvarja NHS s kemično reakcijo.

## NOTE

- When the stop valve is removed, it is a gas accumulation phenomenon. The use of the charging hose should be exclusive use for R32.
- The use of the charging hose should be exclusive use for R32.
- If vacuum degree of -0.1MPa is not available, it may be because of gas leakage or entering moisture. Check for any gas leakage once again. If no leakage exists, operate the vacuum pump for more than one to two hours.

## e.6 QUANTIFY za polnjenje hladilnega sredstva

The length of the pipe (L) and the refrigerant quantity should be charged according to the table below!

Capacity		100/120	140/160
Factory Charge	kg	1.8	2.7
Gross weight (kg)			15
Additional weight (L-L0)	kg		46
Maximum pipe length (m)	m		4
Maximum mm pipe diameter (inch)	m		50
Maximum total refrigerant charge(*)	kg	3.41	4.31
Maximum height difference between outdoor unit and indoor unit			
Outdoor unit is higher than	m		30
Indoor unit is higher than zunanja enota	m		20

The additional refrigerant amount is 1.1kg, there is additional minimum floor area required (mole delailø in

## CAUTION

- When charging refrigerant, accurately measure refrigerant to be charged.

8:6.1 MINIMALNE ZAHTEVE GLEDE POVRŠINE PROSTORA

Če je polnjenje hladilnega sredstva v RSZ ( $m_c \leq 1,84$  kg), je treba v skladu z IEC 60335-1-00 zagotoviti minimalno sobno površino. In sicer zahtevano minimalno sobno površino določimo s hladilnim sredstvom ( $m_c$  (kg)). mora biti v skladu z naslednjim:

$$A_{min} = (m_c / (2.5 * LFL^{(54)} * h_0))^{1/3}, \text{ but not less than } A_{min} = m_c / (h_0 * 0.2303)$$

where

$A_{min}$ : minimum installation area of an indoor unit for a given refrigerant charge ( $m_c$ ) and concentration of refrigerant at height  $h_0$ , in  $m^2$ .

$h_0$ : vertical distance from the bottom (the point of release) of the indoor unit when the unit is installed, in m; and it must not be less than 0.6m.

\* skupni sistem merjenja tlaka lahko biti osnovan na die

indoor area in case of undetected refrigerant leak, in  $m^2$ .

\* LFL: Lower Flammability Limit for R32, 0,307 kg/m<sup>3</sup>.

The minimum required area for the installation of an indoor unit from refrigerant system with a refrigerant charge (mt) of R32 (A2L refrigerant) and a refrigerant charge height (ti-):

Refrigerant charge ( $m_c$ ) [kg]	1.2	1.3	1.4	1.5	1.6	1.7	1.8	1.9
1.84	7.20	5.15	5.71	5.33	4.98	4.70	4.44	4.21
		6.77	7.57	8.59	9.97	11.62	13.51	15.63
2.6	10.68	14.21	12.28	10.98	10.38	9.31	7.41	6.60
		16.32	14.07	12.26	10.77	9.54	8.51	7.64
4.2	21.79	20.55	16.01	13.84	12.26	11.31	9.18	8.04
		20.96	18.07	15.74	13.84	12.26	10.93	9.81
3.6	27.58	23.00	20.26	17.95	15.91	13.74	12.26	11.00
3.8	30.72	26.48	22.57	20.26	17.28	15.31	13.66	12.26
4.0	34.04	29.01	25.01	22.26	19.15	16.96	15.13	13.68
4.4	41.19	35.10	30.26	26.36	23.74	20.97	18.31	16.43

NOTE

For  $m_c \leq 1.84$ kg, IEC 60335-2-40 do not establish any minimum room area restriction. In that case check local regulations to ensure that no hard restrictions may apply.

For intermediate refrigerant charges and installation height, select the higher charge value and the lower height value to choose

the indoor unit.

**CAUTION**

Do not charge OXYGEN, ACETYLENE, or other flammable refrigerants. If a leak occurs, it is recommended that oxygen free nitrogen be charged for these types of tests cycle when performing a leakage test or an air-tightness test. These types of gases are

leakage occurred, it would cause difficulty with breathing or

## 9. ELEKTRIČNI VODIČI

### 9.1 GENERAL CHECK

Prepričajte se, da so krojaške delavnice, ki zagotavljajo oskrbo v stališču, ki zagotavljajo oskrbo v stališču.

Prepričajte se, da je napetost napajanja. Pri 10V "ol la rat'ad xgTigg'e a ô Ćq. earth ITFe Is c'ónnoc:gd. Ch'ěck..ceble..cepachy.

Impedanca napajalne linije je dovolj nizka, da prepreči padec napetosti zaveč kot 15 % nazivne napetosti.

#### DA N GER

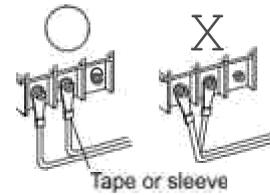

- Do not adjust any wiring or connections unless the main power switch is OFF.
- Check that the earth wire is securely connected, tagged and locked in accordance with national and local codes.
- When using more than one power source, check and ensure that all of them are turned OFF before operating the unit.
- Avoid wiring installation in contact with the refrigerant pipes, water pipes, edges of plates and electrical components inside the unit to prevent damage, which may cause electric shock or short circuit.

#### CAUTION

- Check to ensure that screws for terminal board are tightly tightened.
- Check to ensure that the outdoor fan have stopped before electrical wiring work or periodical check is performed.
- "Redkeje: "zh , ôra/n @e', ej'ěč/zfcâ/ pār/š worn räs'ar orh' vonj ærime/a /r nór prolecreo'.. rae mō ô0ma'ge in//oected
- Wrap the accessory packing around the wires, and plug the wiring connection hole with the seal material to protect the product from any condensed water and insects.
- Tightly secure the wires with the cord clamp inside the unit.
- Lead the wires through the knockout hole to the wiring cover when using conduit.
- Electrical wiring must comply with national and local codes. Contact your local authority in regards to standards, rules, regulations, etc.
- Check that the earth wire is securely connected.
- Connect a fuse of specified capacity.
- Turn OFF the main power switch to the indoor unit and the wiring work or a periodical check is performed.
- Use a dedicated power circuit for the unit. Do not use a power circuit shared with the outdoor unit or any other appliance.

terminals of the unit, specially use protection (sealing) and for wiring, taking into account the applicable national and local regulations. Establish proper earthing; Incomplete earthing may cause electrical shock.

- Keep a distance between each wiring terminal and attach insulation tape or sleeve as shown in the figure.

- Check to ensure that the electrical resistance is more than terminal of the electrical parts. If not, do not operate the system until the electrical resistance is lower and again.

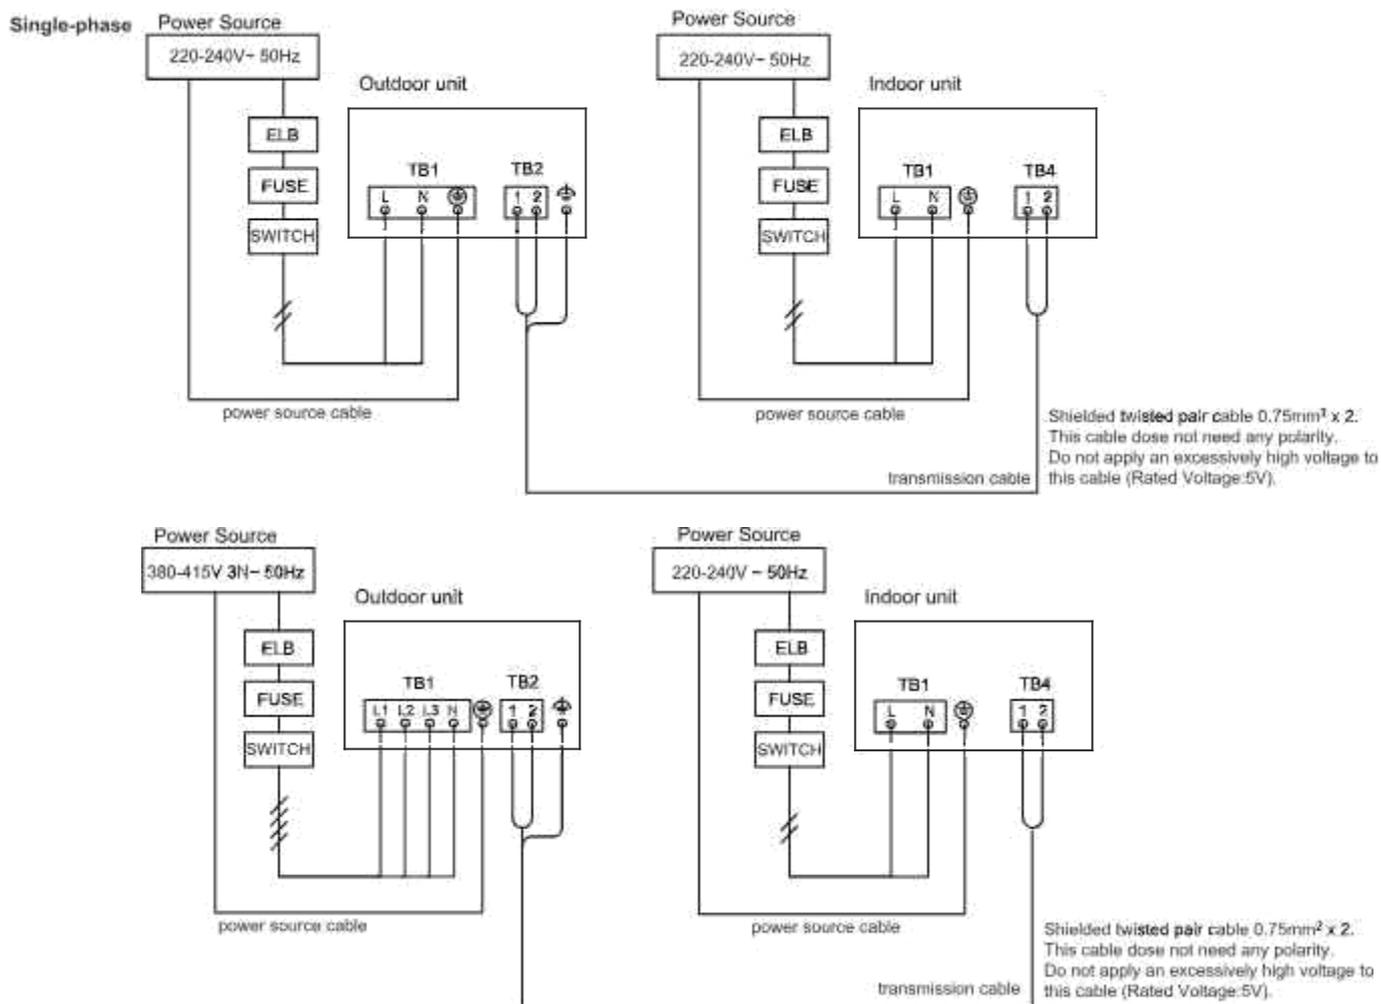

### 9.2 COMMON WIRING

- Use shielded twisted pair wire (more than 0.75 mm<sup>2</sup>) for transmission wiring between outdoor unit and indoor unit.
- Uporabite 2-core žico za lažni prenosni kabel (ne uporabljajte žice z več kot 3 žilami).
- Use shielded twisted pair cable for transmission wiring between indoor and outdoor unit. Do not use a cable with more than 300 m length.
- H-NET shielded twisted pair cable must be grounded in outdoor unit.

#### CAUTION

- Pay attention to the connection of transmission wires. Do not connect the transmission wires to the power lines.
- Check to ensure that the field-supplied electrical components (mains power switches, circuit breakers, wires, connectors and wire terminals) have been properly selected according to the electrical data indicated in this chapter and they comply with national and local codes. If it is necessary, contact with your

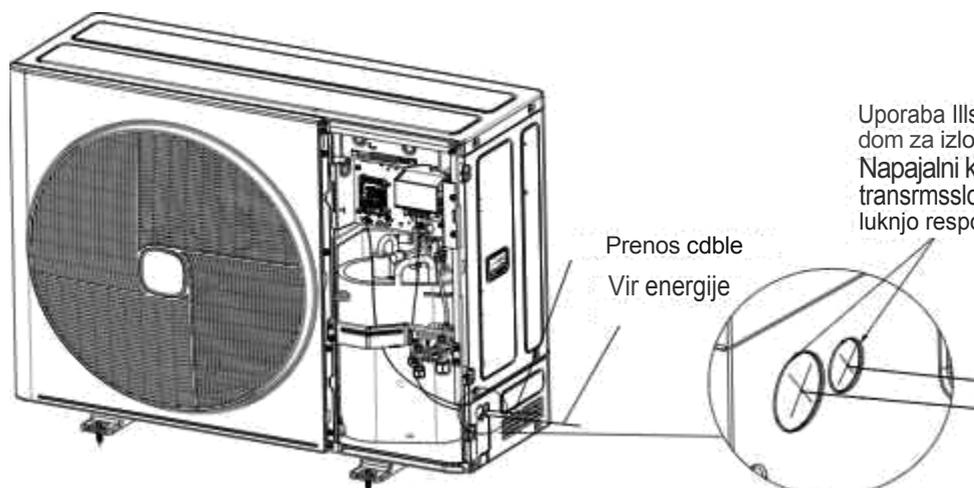

Povezava električne napeljave med zunanjo in notranjo enoto je prikazana na spodnji sliki:

**NOTE**

- All wires shall be firmly fixed with fixing clamps, and ensure that each wire is reliably grounded.

**KAUTION**

- Do not connect the power source cable to the TB2. If connected, the printed circuit board will be damaged.

**9.4 Ožičenje, velikost in zaščita stikala**

Rec'om'm'ended minimum sizes for field-supplied wires and select the main switches according to the table below:

Model	Power supply	Moč. so	Prenos odstopi	Spol. operating current (A)*	CB (A)	ELB (n° poles/A/mA)
		size	size			
AHW-100HCDS1 ANW40H20.G	210-240V- 50 Hz	EN60335-1	EN60335-1	21.9	32	2/32/30
		4.0 mm²	0,75 mm	27.1	32	2/32/30
		6.0 mm²		29.5	32	2/32/30
10.0 mm²						
AHW-1100UEDD1	3 0N15V 3N- EfiHz	2.5 mm²	0,75 mm	9.7	16	4/16/30
AHW-140HED51		2.5 mm²		13.3	16	4/16/30
AHW 160HEDB 1		2.5 mm²		15.7		4/16/30 4/20/30

\* Considering the actual use of end users comprehensively

**NOTE**

- ELB: earth leakage breaker; CB: circuit breaker.
- Follow local codes and regulations when selecting field wires, circuit breakers and earth leakage breakers.
- Use the wires which are not lighter than the ordinary polychloroprene sheathed flexible cord (code designation 60245 IEC 57).

**KAUTION**

- Ensure specifically that there is an earth leakage breaker (ELB) installed for the units (outdoor unit).
- If the installation is already equipped with an earth leakage breaker, ensure that its rated current is not lower than the rated current of the units (outdoor unit).

**NOTE**

- Electric fuses can be used instead of magnetic circuit breakers (CB). In that case, select fuses with similar rated values as the CB.
- The circuit breakers (CB) are also known as thermal-magnetic circuit breakers or just magnetic circuit breakers (MCB).  
It is also commonly known as residual current device (RCD) or residual current circuit breaker (RCCB).

**i NOTE**

- Refer to relevant standards for Above-noted power supply cables size.
- Where power supply cable is connected through junction box in series, be sure to determine the total current and choose wires based on the table below. Selection according to EN 60335-1.

Selection according to EN 60335-1.

Current I (A)	Wire size (mm <sup>2</sup> )
10 ≤ I ≤ 16	2.5

※ 1: In the case that current

- As a minimum, the chosen wires shall not be lighter than the polychloroprene sheathed flexible cord (code designation 60245 IEC 57).
- The wiring specifications for weak-current communication circuit shall not be lower than that for RVV(S)P shielded wires or equivalent,

- For the installation of power cord, the ground wire must be longer than the current-carrying conductor.
- This appliance can be connected only to a supply with system impedance no more than 0.25Ω. If necessary, please consult your supply authority for system impedance information.
- Equipment complying with:

EN/IEC 61000-3-12 provided that the short-circuit power Ssc is greater than or equal to the minimum Ssc value at the interface point between the user's supply and the public system.

EN/IEC 61000-3-12 = European/International Technical Standard setting the limits for harmonic currents produced by equipment connected to public low-voltage systems with input current >16 A and ≤75 A per phase.

(Input current of the unit AHW-100/120/140/160HCDS1 : 21.9/27.1/29.5/32.0A

Input current of the unit AHW-100/120/140/160HEDS1 : 16.1/16.1/16.1/16.1A).

It is the responsibility of the installer or user of the equipment to ensure, by consultation with the distribution network operator if necessary, that the equipment is connected only to a supply with a short-circuit power Ssc greater than or equal to the minimum Ssc value.

Model	Minimum SSC value (kVA)
AWH-1 zuHCDS1	94Zg Z
AWH-160HCDS1	397.44
AWH-100HEDS1	1338.49
AWH-120HEDS1	1338.49
AWH-140HEDS1 AWH-160HEDS1	1338.49

### 9.5 NASTAVITEV POTOPNIH STIKAL

**NOTE**

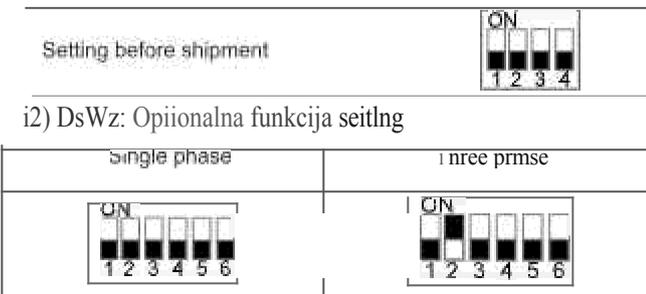

- The mark "■" indicates the dip switches positions.
- No mark "■" indicates pin position is not affected.
- The figures show the settings before shipment or after selection.
- "Not used" means that the pin must not be changed. A malfunction might occur if changed.

**CAUTION**

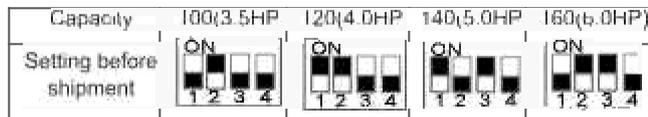

Before setting dip switches, first turn the power supply OFF and then set the position of dip switches. If the switches are set without turning the power supply OFF, the contents of the setting are invalid.

#### 9.5.1 Stikalo DIP na PCB2

(1) DSW1: Unit refrigerant piping  
Changing is not needed.

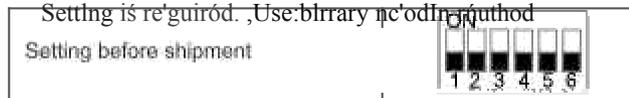

(3) DSW3: Določanje zmogljivosti  
Selekcija ni potrebna.

(4) DSW5: Potrebna je končna nastavev rezis'anas I'Jo nastavev.

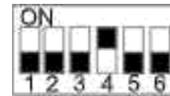

(5) DSW4: Rafrižeratslonski sistem št. seilng,  
Setting is required. Use binary code method

Max No. of available units when the equipment are connected to R410A system

**NOTE**

- Binary encoding method for Refrigeration system No.:  
Refrigeration system No. =  $\sum$  the value of the pin  $\times 2^{(pin\ number - 1)}$  (the value of the pin: the value is equal to 1 when the pin is set as ON, otherwise it is equal to 0.  
Pin number: the figure below the pin, marked as 1-6  
Ex.) Set refrigeration system No. as 8.

Calculation in binary:  $8 = 0 \times 2^{(1-1)} + 0 \times 2^{(2-1)} + 0 \times 2^{(3-1)} + 1 \times 2^{(4-1)} + 0 \times 2^{(5-1)} + 0 \times 2^{(6-1)}$

### 10. TEST RUN

Before starting the test run, perform test run according to the wired remote control manual, and hand over the system to the customer.

**CAUTION**

Do not operate the system until the check done is completed.

1. Do not touch any parts of the outdoor unit until the electrical leakage is found and repaired. Do not impress the voltage on the terminals for transmission 1 and 2.

- Check to ensure that the stop valves of the outdoor unit are fully opened, and then start the system.
- Pay attention to the following items while the system is running:

Do not touch any of the parts by hand at the discharge gas side, since the compressor chamber and the pipes at the discharge side are heated higher than 90°C.

**DO NOT PUSH THE BUTTON OF THE MAGNETIC SWITCH(ES), it will cause a serious accident.**

Do not touch any electrical components within 10 minutes after turning OFF the main switch.

Confirm that the gas line stop valve and the liquid line stop valve are fully open.

Confirm that the leakage of the refrigerant does not exist. The flare nuts are sometimes loosened by vibration during

**Check the refrigerant piping**

Check that the refrigerant piping and the electrical wiring conform to the same system.

Confirm that the dip switch settings on the printed circuit board of the indoor unit and the outdoor unit are correct.

11. GLAVNE VARNOSTNE  
NAPRAVE

d' Zaščita motorja Fzsn

6 C omprgaeor zaščita

Visokotlačno stikalo:

Ta stikalo izklopi delovanje kompresorja, ko tlak na izpustu preseže prodajni tlak.

Ko je temperatura termostata dosežena do te nastavitve, se izhodna moč motorja zmanjša.

V nasprotnem primeru, ko se temperatura zniža, se omejitev je preklican.
